

TUBERCULOSIS*

TB is a leading killer of the day,
It is a global emergency of today,
Spreading like wild fire, record says
India shoulders 1/3 global load, now a days.

Monster kills more than 1000 lives every day
How pathetic, need not to say.
Poor, malnourished & HIV infected
are its favorite preys.

But wicked hands not leave any one who comes in its way.
If cough clogs the airway for more than 21 days
In spite of treatment, it stays & you strive for clear airway
Then rush for sputum exam & X-ray.

If it comes out to be TB
Jump on to the treatment, don't delay.
Forget about coins, you need not to pay.
Now DOT** comes with bright rays,

It is a service to patient in direct way,
It ensures cure & reduces the spread rate.
Prompt diagnosis & uninterrupted therapy,
Change the marks of weakness from morbid & gloomy face.
